Research profile

Computational social scientist trained in computer science and information systems, studying online trust, transparency, and safety through the analysis, evaluation, and design of digital platforms.

Research interests: Platform governance and content moderation; cross-platform information diffusion and systemic risk; AI/LLM evaluation and human-AI collaboration.

Methods: Causal inference and quasi-experimental designs; large-scale digital trace data; computational multimodal analysis and LLM-based measurement; network analysis; surveys and experiments.

Highlights: My first-author publications have appeared in leading interdisciplinary venues such as *Nature Communications*, *CHI*, *WWW*, *CSCW*, and *ICWSM*. These studies provide some of the first large-scale empirical and causal evidence on the effectiveness, limitations, and behavioural consequences of community-based fact-checking systems. Additionally, my work has attracted international media attention through coverage in *MIT Technology Review*, *The Washington Post*, and *New Scientist*, and informed discussions surrounding platform governance and content moderation.

Professional experience

Postdoctoral Researcher

May 2026 – Present

Interdisciplinary Centre for Security, Reliability and Trust (SnT), University of Luxembourg, Luxembourg

Main project: Community-led analysis and reporting to improve trust and transparency (CLARITY)

- Lead research on community-based fact-checking, misinformation, and trust and safety in digital platforms.
- Supervise MSc and PhD students and contribute to teaching at the master's level.
- Establish and strengthen collaborations with international research partners across Europe and beyond.
- Develop competitive research funding proposals, including European and national grant applications.

Ongoing research: Causal evaluation of location transparency feature on X (with Thomas Renault, David Rand, Mohsen Mosleh); the effect of community notes on misinformation producers (with Thomas Renault, Nicolas Pröllochs, Gabriele Lenzini, Mohsen Mosleh).

Education

Ph.D. in Computer Science

Oct 2022 – Apr 2026

Interdisciplinary Centre for Security, Reliability and Trust, University of Luxembourg, Luxembourg

Thesis title: Computational analysis of misinformation engagement and interventions on social media [Excellent Thesis Award Nomination]. 🔗

Defence date: 20/04/2026, successfully passed without conditions

Supervisor: Prof. Dr. Gabriele Lenzini

M.Sc. in Management Science and Engineering

Sep 2019 – Jun 2022

School of Economics and Management, Beihang University, China

Thesis title: Anger can make fake news viral online

Exchange: University of Luxembourg, from Sep 2021 to June 2022

B.Eng. in Information Management and Information System

Sep 2015 – Jun 2019

School of Management, Hefei University of Technology, China

Award: Outstanding graduate

Academic visits

Visiting Research Fellow

Dec 2025 – Mar 2026

Oxford Internet Institute (OII), University of Oxford, UK

College affiliation: Wolfson College, University of Oxford

Host: Assoc. Prof. Mohsen Mosleh

- Undertook a research visit to OII through the Visiting Research Fellowship Programme during my PhD studies.
- Conducted collaborative research on platform governance for online trust and safety.
- Developed a joint research agenda with Prof. Mohsen Mosleh on misinformation and digital platforms.
- Co-authored one paper accepted at CHI 2026 and lead several ongoing research projects.

Institute for Network Sciences and Cyberspace, Tsinghua University, China

Host: Assoc. Prof. Xin Yi

- Undertook a research visit to Prof. Xin Yi's research group at Tsinghua University during my PhD studies.
- Conducted collaborative research on community-based fact-checking and human-AI collaboration.
- Mentored PhD and postgraduate students involved in related research projects.
- Co-authored four papers accepted at CHI 2026 ($\times 2$), EMNLP 2026 ($\times 1$), and ICWSM 2027 ($\times 1$).

Peer-reviewed publications

Funded projects

CLARITY: Community-led analysis and reporting to improve trust and transparency **FNR CORE 2025**

Role: Co-developed the proposal together with Prof. Gabriele Lenzini (PI) and Prof. Nicolas Pröllochs (co-PI). Contributed to the project conception, methodological design, implementation plan, and expected scientific and societal impacts.

Funding agencies: Luxembourg National Research Fund (FNR) and German Research Foundation (DFG)

Host institutions: University of Luxembourg and JLU Giessen

Project budget: €694,000

REMEDIIS: Regulatory and other solutions to mitigate online disinformation **FNR/FNRS 2021**

Role: Doctoral researcher leading research on computational analyses of online misinformation and its interventions, contributing to the project’s scientific outputs and international collaborations.

Funding agencies: Luxembourg National Research Fund (FNR) and FNRS in Belgium

Host institutions: University of Luxembourg and UCLouvain Saint-Louis Bruxelles

Project budget: €747,000

Teaching experience

Focus Activities

Mar 2025

Master in Cybersecurity and Cyber Defense

Interdisciplinary Centre for Security, Reliability and Trust, University of Luxembourg, Luxembourg

Role: Guest lecturer for the session on understanding and mitigating misinformation through computational social science and HCI.

Programming in C

Sep 2019 – Jan 2021

Bachelor in Information Management and Information System

School of Economics and Management, Beihang University, China

Role: Teaching assistant with responsibilities including laboratory instruction, programming exercises, class mentoring, and assessment.

Research supervision

Shuning Zhang, *PhD student, Institute for Network Sciences and Cyberspace, Tsinghua University, China.*

Dai Shi, *postgraduate student, College of Design and Innovation, Tongji University, China.*

Supervision outcomes: Guided research on computational social science and community-based fact-checking, contributing to collaborative publications in leading conference venues, including CHI and ICWSM.

Academic service

Reviewer

Conferences:

- The ACM Web Conference (WWW)
- The ACM CHI conference on Human Factors in Computing Systems (CHI)
- The ACM Conference on Computer-Supported Cooperative Work and Social Computing (CSCW)
- The International AAAI Conference on Web and Social Media (ICWSM)
- The ACL Conference on Empirical Methods in Natural Language Processing (EMNLP)

Journals:

- Information Processing and Management
- Digital Journalism
- Humanities and Social Sciences Communications

Program Committee Member

- CIVIL session at the 11th IEEE International Conference on Data Science and Advanced Analytics

Awards and scholarships

- Guillaume Dupaix International PhD Scholarship (2025)

- Government Scholarship of Grand Duchy of Luxembourg (2022)
- Outstanding Graduate of Hefei University of Technology, Anhui Province (2019)
